# Fighting Cyber Crime

**Address your weakest link. Train your staff to fight cyber-crime.**

## **DESCRIPTION**

This immersive training initiative was developed to minimise the frightening cyber-crime threat to our organizations.

It addresses the weakest link that cyber criminals have learnt to exploit, your staff.

It very effectively gives your staff, and anyone else the awareness they need to identify when an attack is potentially happening and gives them the confidence to act.

In association with MaST UK, Snap Tech International gives you the only cyber security awareness programme with an official UK Government regulated qualification attached, and the ability to train large numbers of employees within one or two weeks.

It provides a solid metric for measuring cyber security awareness and understanding, and an excellent professional development opportunity for employees.

It is far more than just a training course. It is a roughly 60-minute immersive and engaging learning experience that you cannot do without.

Don't wait, this course has been mandated by one of the four biggest UK banks and is currently being rolled out to all global employees.

**Address your weakest link. Train your staff to fight cyber-crime.**

## OBJECTIVES

To turn all your employees into "Cyber Stars", responsible for being able to identify, respond to and mitigate a range of cyber threats.

## TARGET AUDIENCE

Everyone. Your staff. You. Your CEO.

## COURSE STRUCTURE

This movie-based event is based around a three-part drama that examines the essential learning for entry level cybersecurity awareness. It tells the captivating story of a new employee who posts her new job on linkedin, unaware that hackers are targeting exactly that sort of post. She gets hit with a ransomware attack on her new work laptop. She tries to sort things out with the help of her old boyfriend who is something of a geek - which causes some discomfort for her current boyfriend ... who isn't.

This is one of our best sellers - including a mandated roll out for one of the four big banks to all global employees.

## CERTIFICATE

By completing/passing this course, you will attain the certificate Cyber Stars Lite ProQual endorsed Certificate of Learning
